About me

I'm an engineering student in Information and Communication Technologies at the Monterrey Institute of Technology and Higher Education. Among my interests are developing Android apps and games. I have launched some apps to the Playstore. I am also interested in web development. I'm currently getting my Front-End certificate by Free Code Camp.

On my free time I like to translate open source projects (also proprietary projects). With my team, we won the first place at the startup weekend 2016 at Oklahoma State University with the project Certaclear.

Objectives

My goal as a developer is to keep learning useful skills that can help push my career forward so I can keep crafting high quality code.

Education

B. S. Information and Communication Technologies by Monterrey Institute of Technology and Higher Education (2013-2018)

Study abroad program in Computer Science at Oklahoma State University (2016)

Getting my Full Stack Developer Certificate by Free Code Camp (2017-2018)
